5 YEAR WORKING EXPERIENCE

Senior Backend Developer
Stegback Technology Pvt Ltd

02/2023 - Present   *Jaipur*

Achievements/Tasks

- Successfully led the **Product & Order Module** development for https://portal.stegback.de , a robust multi-vendor e-commerce platform.
- Integrated and managed seamless **product sync, upload, and fetch operations** across **major marketplaces** including **Amazon, eBay, Kaufland, Shopify, WooCommerce, Otto** , and **ManoMano** .
- Optimized workflows to ensure **high performance** , **data accuracy** , and **API rate-limit safety** , even while handling large volumes of records.
- **Expert in Laravel ecosystem** with deep experience in MySQL optimization, Jobs, Queue Workers (Database, Redis), Task Scheduling, Service Container & Contracts, Custom Blade Directives, Composer Autoloading, Eager Loading, and writing clean, modular code using service classes and providers for APIs.
- Experienced in **DevOps workflows** , using **GitHub** for ticket management, strategic branching (**Beta/UAT/Production**), and team collaboration.
- Deployed projects using **Docker** , **Microsoft Azure** , **Hostinger VPS** , and **cPanel** , with .env , cron jobs, and queue management.

Web Developer
SAVVY Technology Solutions

04/2020 - 01/2023   *LLC 1431 Opus Place Suite 110 Downers Grove Illinois 60515 USA*

Achievements/Tasks

- **Worked on backend development using Laravel** , focusing on RESTful API design for marketplace integration, product management, and order synchronization. Gained a solid understanding of MVC architecture, Eloquent ORM, MySQL database design, service classes, and job queues. Built scalable APIs with proper validation, error handling, and dynamic data structures to support multi-channel platforms.
- **Hands-on experience with Docker for containerizing Laravel applications** and deploying projects on **AWS EC2, Hostinger VPS, and cPanel-based shared hosting** . Familiar with configuring .env , managing queues, running schedulers via cron jobs, optimizing deployments, and handling Laravel setup across different environments (local, staging, production).

EDUCATION

BCA/MSC IT
SS Jain Subodh PG & autonomous college Session

07/2017 - 05/2022   *jaipur*

SKILLS

`PHP` `Codeigniter` `Laravel` `MERN`

`Node js` `MySql` `jQuery` `HTML, CSS`

`Tailwind CSS` `Bootstrap` `Github`

`JavaScript (ES6+)` `RESTful APIs` `Docker`

`Azure Basic` `JWT Authentication`

PERSONAL PROJECTS

Taxonation (https://taxonation.com/)

- **Taxonation is an online user friendly portal developed by a group of young and Dynamic tax professionals having specialization in various laws and regulations including Taxation, legal, accounting, financial etc.**
- **This online portal is updated by a dedicated team which is working round the clock to ensure that all updated are published in a minimum lead time.**

Apply (https://applystore.org/)

- **Apply Store is an AI focused platform, built to help students discover best courses from top ranked universities globally. Additionally, Apply Store helps Institutions and Companies to find the top talents around the world**
- **In this project there is around 8000+ courses enlisted from top Universities, from the best places of study including Canada, United Kingdom, United States and more. The website features smart search filters, enabling students to discover the most appropriate programs according to their eligibility criteria.**

Stegback E-commerce Portal

- **Stegback Portal** (portal.stegback.com) is a multi-vendor e-commerce platform that helps businesses expand into European marketplaces like Amazon, eBay, Shopify, Kaufland, and Otto. It provides seamless product listing, order management, inventory tracking, automated invoicing, and shipping integrations with carriers like DHL and GLS. The platform offers role-based access, real-time notifications, and API-driven marketplace synchronization, making cross-border e-commerce management efficient and scalable.
